

Woyano.com

Agile Web Developer

Woyano is an internet media company built on technology and powered by its users. Our global consumer website, Woyano.com, provides social networking around content. We also manage social media sites for blue-chip companies. We're passionate about the web and driven by innovation.

We're looking to add an agile web developer to our team, someone bright and versatile who's looking for a fast track opportunity.

You are an Agile/XP PHP Web 2.0 developer who wants to join our cutting edge, open-minded, agile development team. You will be using test driven development and emergent design to develop and improve our world class Web 2.0 social media platform.

Essential Skills & Requirements:

- PHP, Oop, XML, AJAX, HTML, CSS, MySQL, PC, Linux, Mac

Beneficial skills:

- TDD, Ruby, XSLT, XP, Agile, Flash, Computing Degree

To Apply

Please email us (careers@woyanon.com) your updated CV, a cover letter explaining why you want to join Woyano and provide existing URLs/Websites/Open source code that you have previously developed.

No agencies please
